1 Introduction

You can and should cross-reference sections and sub-sections. We use R Core Team [1], and H. Wickham $et\ al.\ [2]$.

The remainder of this paper is structured as follows. Section 2

2 Data

Some of our data is of penguins (Figure 1), from A. M. Horst, A. P. Hill, and K. B. Gorman [3].

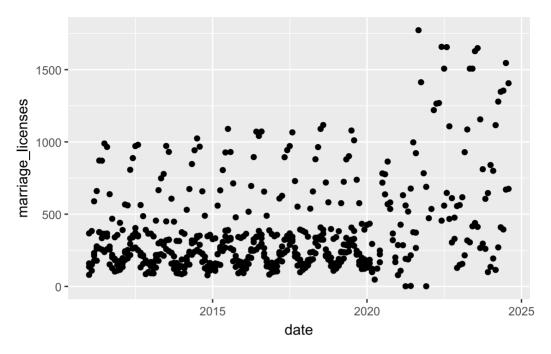

Figure 1: Bills of penguins

Talk more about it.

And also planes (?@fig-planes). (You can change the height and width, but don't worry about doing that until you have finished every other aspect of the paper - Quarto will try to make it look nice and the defaults usually work well once you have enough text.)

3 Discussion

3.1 First discussion point

If my paper were 10 pages, then should be be at least 2.5 pages. The discussion is a chance to show off what you know and what you learnt from all this.

3.2 Second discussion point

3.3 Third discussion point

3.4 Weaknesses and next steps

Weaknesses and next steps should also be included.

Appendix

4 Additional data details
